flowing streams of the south of Eug- eards and chess. Their chessmen, land-notably the upper waters of the | which they form from the teeth of wild Lea, the Ver, and the Mimram, all animals, are elaborately carved in the llertfordshire streams—the "tailer" is | most enrious patterns. well known to the exasperated dryfly fisherman. "Aud what en earth is the 'tailer'?" the angier not acquainted with these and other similar waters may inquire without shame The "tailer," says the Pall Mall Bud-

get, may be best described as a rather

gress feeder, destitute of the artistle instinct and the culture which the dryfly fl-herman associates with the tront that can only be taken by an exact imitation of natural fly. It is called a "tailer" because, when its head is plunged into the weeds in pursnit of freshwater shrimp, its tail breaks the surface of the stream and waves in the air. At the commencement of the fishing season the "isiling" trout is usually very busy, and very observable in several famous rivers. At this season of the year the larger fish are, as a rule, in indifferent or in absolutely bad condition; they are exceedingly hungry after the ex haustion of spawning operations, and are consequently not in the humor to waste time on an occasional small live dun, or some other insignificant y. Water-shrimp is fat and appeising, and in many streams exceedingly plentiful. It is not surprising, therefore, that it forms the staple dlsh of tront, which the pnugs of hunger in the early spring assail almost uuceasngly. In early June the big trout will eschew water-shrimp for May-fly, and later on in the season, when they are in tine condition, will feed with be

stream with a "dry" over a "tailer." he fi-h ls so engrossed in its pig-like operations among the weeds that it treats with contempt a solitary little dun endeavoring to tickle its uose. Il we a lee Nee Res le de smatel on The best lure for a "tailer" is a big and gaudy alder, fished down stream within a few inches of the fish, and worked like a salmon fly. At such a lure a "tailer" will come sometimes with a writer had the pleasure of landing a much heavier trout, "tailing" under J. H. PCAFIL, at Clin as Office the bank in an awkward place, was eral times, but in vain.

It is not much use, as a rule, fishing

titting daintiness.

A "tailer" is often difficult to scare, and even when netually risen and Truth. pricked will recommence feeding in a few minutes, oblivious of danger. The position of the fish, its head buried in the weeds and its tail waving like a flag in the air, unturally renders it . I VOWING MACHINES | easy to approach and difficult to alarm on such ocea ions. Moreover, a "tailer" seems to riot in its rather nasty meal. The water- brimp glut takes possessien of the lag fish as completely as the

> What creature the "taller" takes the lds alder, fished in the manner described, to be is very uncertain. Some few people assert that fish take a fly under an h conditions not from molives of hunger so much as of anger discled with euriosity. But practical nglers and naturalists laugh at such ta the theories. No doubt the trout s the allier as the salmon takes the r doesor because it looks good to But what particular food it is taken for remains a mystery.

> > HE GOT THE QUARTER.

Ride That Proved Quite Expensive for the Briver of the Stage. Dr. Samuel G. Dixon, a well-known elentist of the Quaker city, told a Biladelphia Record man an amusing story of a scene witnessed in New York the other day while riding in a "ifth avenue stage. "A lady gave the river a coin," said Mr. Dixon, "und eceived change for twenty-five cents." She Informed the driver that she hall given him fifty cents, but the jehu wouldn't have it that way, and the woman had simply to lose twenty-five eents. A moniful or two later, how ever, a well-dressed, highly respectable oking male passenger, with a rather allid face und a physique by no means thletic looking, tendered the lady a quarter and said he had seen the whole transaction and knew she was being swindled. 'I'll get it back,' said he you take it.' After some persuasion weanan was induced to take the noney, and shortly afterward she and all the other passengers except myself and the man who had produced the eash left the 'bus. When we arrived at the end of the line the stranger

"A volley of oaths was the only aner, which, however, was cut short by well-directed blow from the fist of passenger and the driver went wn. He got up with another shower of profanity and made for his assailnt, but promptly went down again, the blow this time landing full on the jaw. When the driver got up the second time he gave up the quarter. But the passenger wasn't through yet. 'I've split my gloves on your face,' he he said, and I want two dollars and fifty ceuts to bny a new pair.' Refusal brought another punch, and again the driver measured his length. He didu't want any more, but gracefully handed his puncher the demanded two dollars and fifty cents. I ascertained afterwards that the gallant passenger was Billy Edwards, the ex-prize fighter, and the other drivers are, I nuderstand, still clinfling their associate on

his encounter and its results." THE MIKADO'S MOTHER-IN-LAW. Her Itiness Was Due to the Introduc tion of Railroads.

The mikado of Japan has a motherin-law, and that mother-in-law was lately attacked by a serious illness. So grave were the symptoms that four hundred and twenty-three specialists were at once summoned to the sick lady's bedside. This, however, is not quite the right way of putting it. The doctors being so numerons, the patient had to go to them, and, though the ease was not a surgical one, the operating theater of the largest hospital was selected as the only suitable arena for the united labor of the four hundred and twenty three. It is not surpri ing to read that after the first hour she showed symptoms of the great-

It causes scople to pay twice as much rental in the downtown residence district for houses not linlf as good as could be gotten uptown, not to say anything of the questionable pleasure of living among saloons, groceries and shops of all kinds. Justead of dying out, as one would expect it to do in this enlightened age, this feeling regarding the difference one's place of residence makes upon his social standing is positively becoming more bitter. This is one of the peculiarities that Philadelphia will retain as long as it exists. Any attempts that have been made to obliterate the dividing line have only ended in dismul failure, leaving the situation much worse than before. It seems that common seuse was not dispensed with a very free hand in Philadelphia, at least on this one point.

THE WORLD WOBBLING.

cientists Try'uz to Plud Out if the Earth Is Off Its Base. It may not be very generally known, writes a Washington corresponder: that observations are to be made simultaneously at Washington and at Manila, in the Philippine islands, which is almost directly opposite Washington on the other side of the globe, to see what is the matter with the axis of our little planet. Observations show that for some time the earth has not been revolving on that important, if imaginary, support, as she has done for centuries, and scientists have deeided that it is time to find out, If possible, what it all means. Those who have studied the subject declare that, if the variations continue, in the ourse of some very long and very ladef nite period we shall have an arctic limate at Washington, and the latitude of every place on the globe will be chauged, and our geographles will be useless. An equatorial telescope has been finished and sent to Manila hat do you think of a woman who and before long diligent inquiry will amstances. She asked for the was the owner of eighty-nine dresses be made into the whys and wherefores
